Qualitative information for forecast for consolidated business results for the year ending March 31, 2011 (April 1, 2010-March 31, 2011)

As below, ASICS amends forecast for consolidated business results for the year ending March 31, 2011 (April 1, 2010-March 31, 2011) owing to the progress of the second quarter of FY2011 and the acquisition of 100% ownership of HAGLÖFS HOLDING AB and its subsidiaries as well as Agence Québec Plus Ltée and its subsidiary.

Although domestic sales will fall below the previous forecast, Net sales will exceed the previous forecast thanks to the above new consolidated subsidiaries besides strong sales in overseas.

Operating income remains in the previous forecast because of slight excess in overseas sales and decline in domestic sales.

Mainly due to exchange loss, Ordinary income and Net income will fall below the previous forecast respectively.
